PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/771,816	Applicant(s) MURASHITA ET AL.	
	Examiner MICHAEL ROZANSKI	Art Unit 3768	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 5/15/08 has been entered.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Kawagishi et al (US 6,352,509).

Kawagishi et al disclose a three-dimensional ultrasonic apparatus including a cardiac cavity detecting portion 8 comprising processors for executing a predetermined cardiac activity detection algorithm and detects data concerning the cardiac activity of the left ventricle of the heart based on the three-dimensional spatial distribution data from the echo or doppler processor by way of these processors (col 6, lines 7-12). The

Art Unit: 3768

apparatus also includes extracting data of a cardiac endocardium M1 of a left ventricle LV corresponding to the boundary position of a cardiac cavity OB of the left ventricle from 3D morphological information (col 6, lines 28-35). A basis axis setter is used for setting a basis axis (long axis AX, or major axis) in the target tissue (left ventricle LV) based on a shape of the target tissue (see figure 10). A reference cross axis setter (division plane PL) sets a plurality of reference cross sections each having a different rotational angle from each other with the basis axis AX as an axis of rotation (col 9, lines 37-40). A basis cross section selector is used to select a basis cross section from the plurality of reference cross sections based on a characteristic of the target tissue (col 9, lines 58-65). A cross sectional image former is used for forming a cross sectional image of the target tissue based on the volume data, which corresponds to one of cross sections set with the basis cross section as a reference and the basis cross section. Further the cross section is displayed (col 9, lines 55-58).

Response to Arguments

Applicant's arguments with respect to claims 1-19 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to MICHAEL ROZANSKI whose telephone number is (571)272-1648. The examiner can normally be reached on Monday - Friday, 8-4:30.
